About me

Frontend Developer specializing in React and Next.js, with experience building scalable enterprise applications, modern architectures, and high-performance user interfaces. Skilled in performance optimization, authentication systems, complex dashboards, and delivering production-ready solutions across cybersecurity, finance, and business platforms.

Experience

Frontend Developer (on site) | Pod soft, Tehran (Aug 2024 - Present)

- Cyber Threat Intelligence Platform (Next JS, React)
- Sole Frontend Developer who built a cybersecurity **search platform** from scratch.
 - Created a scalable **feature-based architecture** with 30+ routes, reusable components, **advanced search** filtering, and data-driven UI modules.
 - Developed **D3.js visualizations**, infinite-scroll interfaces, JWT authentication, and **TanStack Query** data management.
 - Optimized performance to a **92% Lighthouse score** using code splitting, skeleton states, and caching strategies.

- Security Scanning Platform (Next JS, React)
- Built a Security Scanning Platform from scratch for IPs, Domains, CIDRs, Subdomains, and Applications.
 - Developed dynamic Tool Builder and Scan Template workflows using React **Hook Form, Zod, and reusable components**.
 - Implemented **scalable** data management modules with advanced tables, filtering, sorting, CRUD operations, and asset selection flows.
 - Optimized frontend architecture, performance, and API integration through **modular design and code-splitting strategies**.

- CTI Management & Security Analytics Platform (Next JS, React)
- Built a **CTI platform** from scratch with Next.js, React, Zustand, and TanStack Query.
 - Implemented **RBAC, JWT authentication, refresh tokens, and middleware validation**.
 - Developed dashboards for cyber threat intelligence assets and **reusable data tables with advanced filtering**, sorting, pagination, and **infinite scrolling**.
 - Added **i18n, dark/light themes**, and landing page animations.
 - Collaborated on API design and containerized the frontend with **Docker, Nginx**, and Docker Compose.

Frontend Developer (remote) | Kifpool.me, Dec 2024 - May 2025

- Enhanced a **Next.js wallet platform** with **responsive UI**, API integrations, and **middleware-based authentication** across shop, payment, POS, and invoice modules.
- Improved stability and maintainability in a large-scale production codebase.

Frontend Developer (freelance) | Courthub (Nextis, Daisiyui, Tailwind)

- Improved a ticketing platform by enhancing **responsive** UI, optimizing booking flows, and resolving frontend issues for production readiness.

Also worked with **django, docker, nginx, python, telethon, nexus, metabase** and some other tools in some usecases.
